

energymenu

BY ASHBURNER FRANCIS CONSULTING ENGINEERS

INTRODUCING THE “ENERGYMENU”. GUIDING YOU THROUGH THE MAZE.

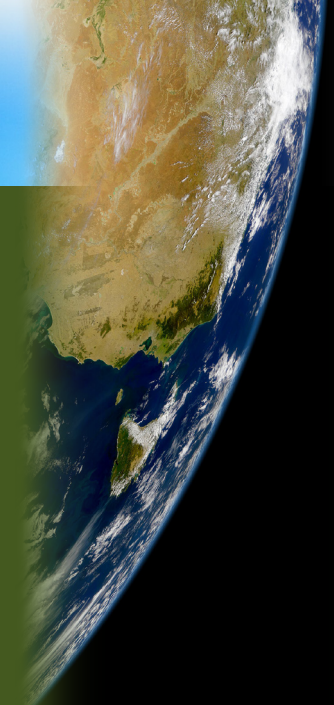

As a leading Mechanical, Electrical and Energy consulting practice in Australia, Ashburner Francis welcome the energymenu, our Ecological Sustainable Developments (ESD) program aimed at Architects, Developers and property owners throughout Australia.

The energymenu is an easy to use and responsive service to make sense of legal obligations and available Energy tools within the Australian construction industry.

The energymenu offers a clear, understandable

breakdown of the services on offer and gets to the point, helping to make sense of which tool is for you, breaking down the engineering barriers and demanding terminology.

Ashburner Francis are advocates of Energy Efficiency and since its incorporation in 1976 has endorsed ESD principles through design. Whether you are an Architect designing a modern facility, developer wishing to attract high-end tenants, or an organisation concerned about increasing operational costs, the energymenu has an option for you.

BCA Energy Efficiency Compliance

James Watt Options	Section J Deemed to Satisfy Analysis
Anders Celsius Option	JV1 Verification Method
Andre Ampere Option	JV3 Verification Method
Michael Faraday Option	Residential Building Thermal Performance Method
Lord Kelvin Option	BASIX

NABERS

James Joule Option	Predicted Analysis
Thomas Edison Option	Third Party Assessment

Energy Audits

Daniel Fahrenheit Option	Level 1 Energy Audit
Georg Simon Ohm Option	Level 2 Energy Audit
Blaise Pascal Option	Level 3 Energy Audit

Green star

Heinrich Hertz Option	Mechanical and Electrical Components
Isaac Newton Option	Energy Conditional and ENE-1 Report
Alessandro Volta Option	Daylighting Analysis
Nikola Tesla Option	Thermal Comfort Analysis (Predicted Mean Vote)
William Rankine Option	Air Change Effectiveness Analysis
Albert Einstein Option	Complete Green Star Submission
